Transaction costs (TC) is a measure to determine the costs incurred in buying and selling the underlying assets of a portfolio or CIS, expressed as a percentage of the average daily value of the portfolio or CIS calculated over a period of three years on an annualised basis. TC are a necessary cost in administering the portfolio or CIS and impacts returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of portfolio or CIS, the investment decisions of the investment manager and the T ER. Total investment charges is a measure of the total value of portfolio incurred as costs relating to the investment of the portfolio or CIS. A higher TER/TC does not necessarily imply a poor return, nor does a low TER/TC imply a good return. The current TER may not necessarily be an accurate indication of future TER/TC's.
